

Coronavirus Prevention Guidelines for Fukui Residents Ver. 33 Underline indicates changes from previous version

We ask all Fukui Prefecture residents to follow the following guidelines to prevent the spread of the Novel Coronavirus (COVID-19).

Sugimoto Tatsuji, Governor of Fukui

[For all residents of Fukui Prefecture]

1 Turn mask-wearing and other basic prevention measures into a habit

- Always wear a mask (except when outside with nobody else nearby). Wear a mask when talking with others, especially during meals except for when physically eating.
- Practice social distancing from others (minimum 1 meter, when possible 2 meters)
- Wash hands when arriving home and before eating. Avoid touching your eyes, nose, and mouth carelessly.
- Keep rooms well ventilated (ventilate twice per hour, for a couple minutes each time).
- Take careful consideration before traveling to and from regions with widespread outbreaks of COVID-19[※].
※A list of prefectures with 15 cases or more per 100,000 population within the last week is available on the Fukui Prefecture Website (Updated Daily)
- Follow basic infection precaution measures strictly while traveling outside of Fukui, including avoiding crowds. Monitor your health closely after returning from traveling.

2 Lower your risk of potential infection

- Avoid confined spaces with poor ventilation, crowded areas, and talking in close contact. These three factors are the biggest risk factor for spreading and contracting the coronavirus and it is important to avoid settings where these factors overlap.
- Only eat with other people if you can ensure you all will “mask up at meals” (wearing masks whenever speaking, only removing it to eat). If you cannot, do not go out to eat.
- When visiting non-eating or drinking establishments, check that the stores you visit are displaying the “Fukui Infection Prevention Sticker” and refrain from visiting establishments not displaying the sticker.
- Download the national contact-tracing app (COCOA) to your phone. If you receive an alert from the app, please contact the Fukui Coronavirus Consultation Center (0776-20-0795).

3 If you feel ill

- If you feel ill, do not go outside or go to work.
- If you have a fever or other symptoms, call your regular doctor or nearest medical institution.
If you do not have a regular doctor or are unsure of where to go, call the Coronavirus Consultation Center (0776-20-0795) and follow their guidance
- If a family member is ill, wear masks even at home and isolate their living space

by staying in separate rooms and eating separately.

[For employers or business owners]

4 Make your workplace or business safe for all

- Store and business owners should strictly follow infection prevention guidelines and display the “Fukui Infection Prevention Sticker”.
- If someone that has been at the store is known to be infected, cooperate with the subsequent contact-tracing investigation conducted by the Health Center by providing all available information including customer contact lists, and releasing the results of PCR tests and facility names to the public.
- Employers should take extra prevention measures to prevent the “3 Cs” from overlapping in enclosed spaces such as smoking areas, locker rooms, and cafeterias.
- Ensure masks are worn by all employees at lunchtime and on breaks.
- Employers should consider implementing comprehensive policies to reduce the risk of infection, including implementing work-from-home (telecommuting), dividing employees into different shifts to reduce the number of people in the workplace at one time, and conducting business remotely when possible in place of business trips.
- Create a work environment where employees feel safe and comfortable to take off work if they are ill.
- Restaurants should remind customers to wear their masks while talking at meals.

[To all Fukui residents and business owners]

5 Do not discriminate or spread false rumors

- Do not discriminate or spread false rumors regarding patients, close contacts of patients, medical professionals, their families, or others involved.
- Do not discriminate against those that have not taken the COVID-19 vaccine or force them to take the vaccine.
