

# Study Tour in California

Hosted by Fukui Prefectural Board of Education

## Group D

The 10th Day

Wednesday

March 22, 2013

## The second day of the buddy program

The students met their buddy again and went to their second period classes. Some students looked very excited to be with the buddies and others looked a little intimidated. Some of the students said that American high school students talk too fast! The students' musical we saw at the high school was very well performed.

It was a sad farewell but students will stay in touch!

## Visiting Ontario Fire Department

In the afternoon, we visited Ontario Fire Department. Firefighters were very kind and told us a lot of information about their work. It was surprising to know that fire engines had a lot of medicines and medical kit such as injections, and firefighters are trained to put medical treatment on people just like doctors.
