

Notice from the Fukui Prefecture Port Management Department

Frequent Quay Wall Damage Caused by Reckless Maneuvering!

At ports in Fukui Prefecture, quay damage is frequently occurring due to unsafe berthing and unberthing without using tugboats.

If you cause damage to the quay:

- You will need to repair your vessel (at your own expense).
- You will be responsible for restoring the quay wall, which may cost tens of millions of yen.
- Port usage will be restricted, causing inconvenience to other users.

These accidents affect everyone involved.

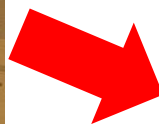

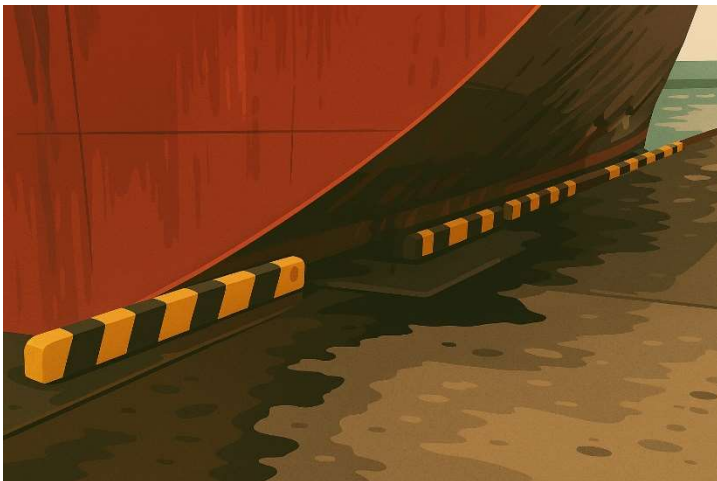

● Examples of Damage

- Case①※ (Based on an actual collision accident – Image created with Copilot)

(Repair of quay wall + replacement of wheel stopper and mooring post)

- Case②※ (Based on an actual collision accident – Image created with Copilot)

(Replacement of wheel stopper + repainting of mooring post)

**Request from the Fukui Prefecture
Port Management Department**

To ensure safe maneuvering, please avoid unsafe operations when entering or leaving the port.
Please consider requesting assistance from tugboats or pilots in advance.
